

Getting started is easy.

Instructions Cox Business Internet Gateway

Here's what's in your kit:

Power cord

Coax cable

Gateway

Ethernet cable
(optional for install)

And here's what you'll need:

Smartphone, tablet, computer or phone

Help us send zero waste to landfills by recycling the kit once you're finished.

Step 1 Set Up the Gateway

A Plug in the Gateway

First, connect the **coax cable** ① to the "Cable from Wall" port on the Gateway and to an active cable outlet.

Then connect the **power cord** ② to the Gateway and to an electrical outlet. Make sure the electrical outlet isn't connected to a dimmer or switched outlet.

B Wait for the Gateway to boot up

Wait a **few minutes** for the Gateway to **power on**. You'll know it's ready when the **Online light stays solid**. This may take up to 10 minutes.

The **Ethernet cable** is an **optional non-wireless connection**. Plug it into an Ethernet port on the Gateway and to the WAN port on your computer.

C Connect to the wireless network

Open the **wifi settings** on your smartphone, tablet, or computer.

Using the label on the bottom of the Gateway, connect to the network using the **SSID** network name and the **PassPhrase**.

Open a browser and surf the web to confirm you are online.

D Plug in the Phone

Connect the telephone cord that came with your phone to the **Tel 1 port** on the back of the Phone Modem for your first line and **Tel 2 port** if you have an additional line. Connect the other end to your telephone. Call 1-844-208-3743 to complete the activation of the Phone.

Step 2 Set Up Network Names and Passwords

- A** Using the login information emailed to you, log into coxbusiness.com/myaccount, where you should:
- Personalize network names and passwords
 - If applicable, configure your Gateway with a Static IP

? FAQs

Why isn't my Gateway working?

Try rebooting— unplug the power cord from the wall, wait 10 seconds, then plug it back in. Make sure all connections are tight. If this does not work, try restarting your computer.

Which coax outlet should I use?

Find a centrally located, active outlet, not surrounded by metal objects. It's common to have inactive outlets so try a different outlet if need be.

Why do I need to log into MyAccount?

You be walked through personalizing network names and passwords and, if applicable, configuring the Gateway with a Static IP address.

What's the Ethernet cable for?

It's an optional cable to hard-wire your computer to the Gateway.

Where can I find information on Malblock if I purchased that service?

What's the Ethernet cable for?

It's an optional cable to hard-wire your computer to the Gateway.

Is there an option to add a battery for backup power needs?

Yes, if your line benefits from a backup battery, please contact your sales team to order a critical line, with professional install. There are increased charges for critical lines. This kit is ready for install for a standard line, which does not require a backup battery.
