Ask the customer...

...follow up with a bit more detail.

Does your phone ever feel slow when loading apps, photos, or websites?

With the next-gen **Google Tensor G2** on Pixel 7a, apps launch faster, pages and images load quicker, and everything runs smoother.*

Have you got a favorite picture of a special moment but it turned out blurry?

Photo Unblur removes blur and visual noise from entire images, no matter when you took them or what device you used.‡

Do you ever connect to public Wi-Fi in places like cafés and airports?

With **VPN by Google One** at no extra cost, Pixel helps protect your online activity no matter what app or web browser you use.√

Do you find yourself running out of battery before the end of the day?

Pixel 7a's **Adaptive Battery** uses machine learning to prioritize the apps you use the most, so your battery lasts longer.†

* Compared to Pixel 6a. Speed and power efficiency claims based on internal testing on pre-production devices. † Requires Google Photos app. Photo feature may not work on all image elements. √ Restrictions apply. Some data is not transmitted through VPN. Not available in all countries. All other Google One membership benefits sold separately. Customers might ask...

What's included in the box?

Your Pixel 7a purchase comes with a 1 m USB-C® to USB-C® cable (USB 2.0), quick start support card, Quick Switch Adapter, and SIM tool. Pixel 7a does not come with a 30 W USB-C® power charger, but that can be purchased separately.

What are the main improvements from Pixel 6a?

The Google Tensor G2 processor is faster and more efficient than the original Google Tensor, bringing more helpful features, enhanced security, and improved photo and video quality.* Pixel 7a has a 64 MP rear camera, higher than previous Pixel A-Series devices, and a 13 MP ultrawide camera with a 120° field of view. It also comes with 8 GB of RAM to help keep your apps run smoothly, compared to 6 GB on Pixel 6a. Face Unlock has been added, providing a quick, easy way to unlock your phone. And for the first time on an A-Series device, Pixel 7a has wireless charging.

What is a VPN and why do I need one?

A VPN is a Virtual Private Network. When you enable a VPN, your online data is protected by traveling through a strongly encrypted tunnel, and your IP address is hidden. This means you're not in danger of anyone attempting to access your data. With VPN by Google One at no extra cost, Pixel helps protect your online activity no matter what app or web browser you use.√

This will be my first Pixel device, is it easy to switch?

No matter what phone you're coming from, you can transfer your stuff, like photos or messages, from your old phone to your Pixel in [a few simple steps](#). You can do it by backing up your data on the Google Drive app or connecting both phones to the Quick Switch adapter.
